

Kurra Nikhil Teja

Email: nikhiltejakurra14@gmail.com | [LinkedIn](#) | [GitHub](#) | Mobile: +91-905963056

SKILLS

Languages: Python, JavaScript, SQL
AI/ML: Supervised ML, XGBoost, Scikit-learn, PyTorch/TF, LSTM
GenAI: LLMs, Prompt Engineering, AI Agents, Gemini API
Cloud: Azure (ADF, Databricks, ML, Storage), AWS (EC2, Lambda, S3)
Data Engineering: ETL, ADF Pipelines, Delta Lake
Tools/Platforms: Git/GitHub, Docker, Excel, Canva.
Soft Skills: Problem-Solving, Adaptability & Curiosity, Time management

INTERNSHIP

Deloitte Data Analytics Virtual Internship

- Analyzed structured business datasets to identify trends, patterns, and actionable insights that supported data-driven decision-making.
- Performed data cleaning, validation, and visualization to improve data quality and effectively communicate analytical findings.
- Applied exploration data analysis (EDA) techniques to evaluate business case studies and identify opportunities for process improvement.
- Interpreted analytical results and developed data-driven recommendations to address business challenges.
- Collaborated in a simulated consulting environment to solve real-world business problems using analytical thinking and structured problem-solving.
- Documented findings and presented business insights in a clear and concise manner for stakeholder understanding.

PROJECTS

E-Commerce Supply Chain Management System | *Java, MySQL, HTML, CSS, Java Script, Node.js* |

- Developed an end-to-end supply chain management system to manage inventory, supplier information, customer orders, and delivery tracking.
- Designed and implemented CRUD operations with MySQL to enable efficient data storage, retrieval, and management.
- Built modules for inventory management, order processing, supplier management, customer records, and shipment tracking.
- Optimized database operations by implementing secure storage and retrieval of customer, product, and transaction data.

Fake News Detection System | *Python, NLP, LSTM, Word2Vec, Spark, Flask, AWS* |

- Developed an LSTM-based deep learning model using Word2Vec embeddings to classify fake vs real news with ~96% accuracy.
- Processed and cleaned 70k+ news articles using NLP techniques and Spark to create scalable, model-ready datasets.
- Deployed the prediction system using a Flask API on AWS EC2 with a web front-end hosted on AWS S3.
- Enhanced model performance through dropout, early stopping, and multiprocessing to reduce overfitting and improve training efficiency.

Student Course Management System | *HTML, CSS, JavaScript, MySQL, React.js, Node.js, AWS* |

- Developed a role-based course management system with secure authentication for Admin, Faculty, and Student users.
- Integrated a MySQL database to enable efficient storage, retrieval, and management of student, course, and attendance records.
- Built modules for course enrollment, attendance tracking, and academic record management to streamline administrative workflows.
- Implemented CRUD operations and backend APIs to support seamless management of student and course information.

CERTIFICATES

AWS Certified Cloud Practitioner | AWS | [Link](#)

Java (Basic) | HackerRank | [Link](#)

MultiCloud Network Associate | Aviatrix | [Link](#)

Automation Anywhere Certified Essentials RPA Professionals | (Automation 360) | [Link](#)

EDUCATION

KL University

Guntur, Andhra

Pradesh

Bachelor of Technology - Computer Science and Engineering; CGPA: 8.9

Jun 22 – May 26

Sri Chaitanya Junior College

Hyderabad, Telangana

Intermediate; Percentage: 90.4%

Jun 20 – Mar 22
